

Deploying Your AI Project

Task #1

Creating Your Own Website

lots of free website options available..

Step 1: Signing Up A Free GitHub Account

You can sign up your account at <https://github.com/>

not necessarily need to use this but this one is free

The username will become the URL of your website

Email*

xitheory+test1@gmail.com

Password*

.....

Password should be at least 15 characters OR at least 8 characters including a number and a lowercase letter.

Username*

chloehku

Username may only contain alphanumeric characters or single hyphens, and cannot begin or end with a hyphen.

Create Repository

Create your first project

Ready to start building? Create a repository for a new idea or bring over an existing repository to keep contributing to it.

Create repository

Import repository

The repository name should be “[username].github.io”

General

Owner *

chloehku ▾

Repository name *

chloehku.github.io

✓ chloehku.github.io is available.

Create Your Codespaces

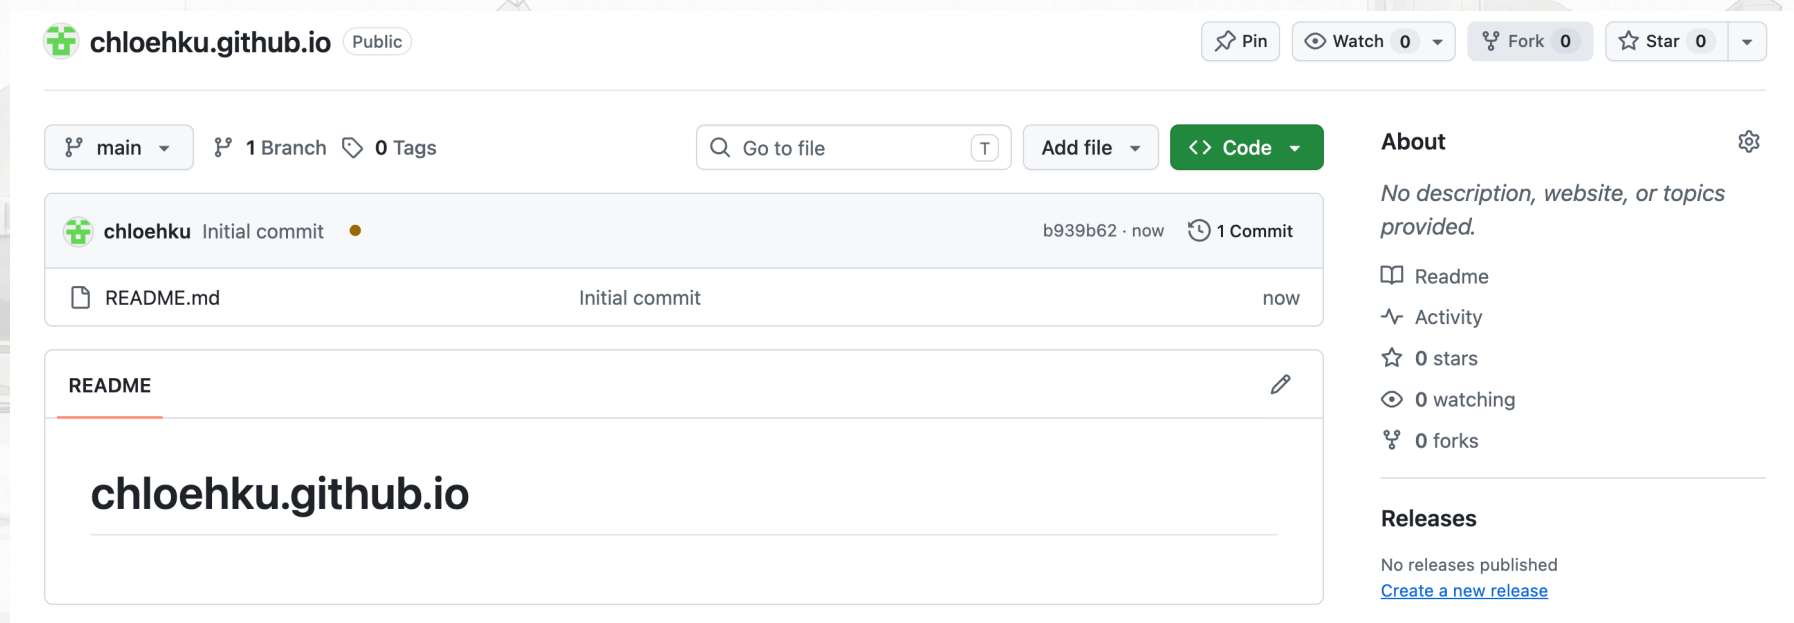

Start coding with Codespaces

Add a README file and start coding in a secure, configurable, and dedicated development environment.

Create a codespace

Go back to your GitHub page

The screenshot shows a GitHub repository page for 'chloehku.github.io'. The repository is public and has 0 stars, 0 forks, and 0 watches. It contains a single file named 'README.md' which was committed initially. The README content displays 'chloehku.github.io' in a large font. The right sidebar includes an 'About' section with no description, a 'Readme' link, and an 'Activity' link. The 'Releases' section indicates no releases are published and provides a link to 'Create a new release'.

Step 2: Creating a Website with WorkBuddy

Sign in your WorkBuddy account.

You can also use Codex / Claude Code which require VPN and Claude/GPT subscription.

Chat with your AI until you are satisfied!

 Chloe_Chan_CV.docx I would like to turn this CV into a personal website. Give me a few templates for me to choose from. Don't do anything else.

 **WorkBuddy AI**

Completed 1m50s >

Four mockups are above. Quick recap:

- **A · Warm editorial** — closest to what you used before (terracotta + cream + serif). Story-led, soft, recruiter-friendly.
- **B · Clean recruiter** — ink-on-white sans-serif. Reads like a polished PDF; fast for HR to skim.
- **C · Studio portfolio** — photo-led, "creator" energy; best if you want *Hidden Hong Kong* to lead.
- **D · Insight lab** — numbers up front (1.2M, +24%, -18% CAC); leans into your analytics side.

Step 3: Deployment

I want to now deploy it on my GitHub by dragging files. Show me the files and the steps.

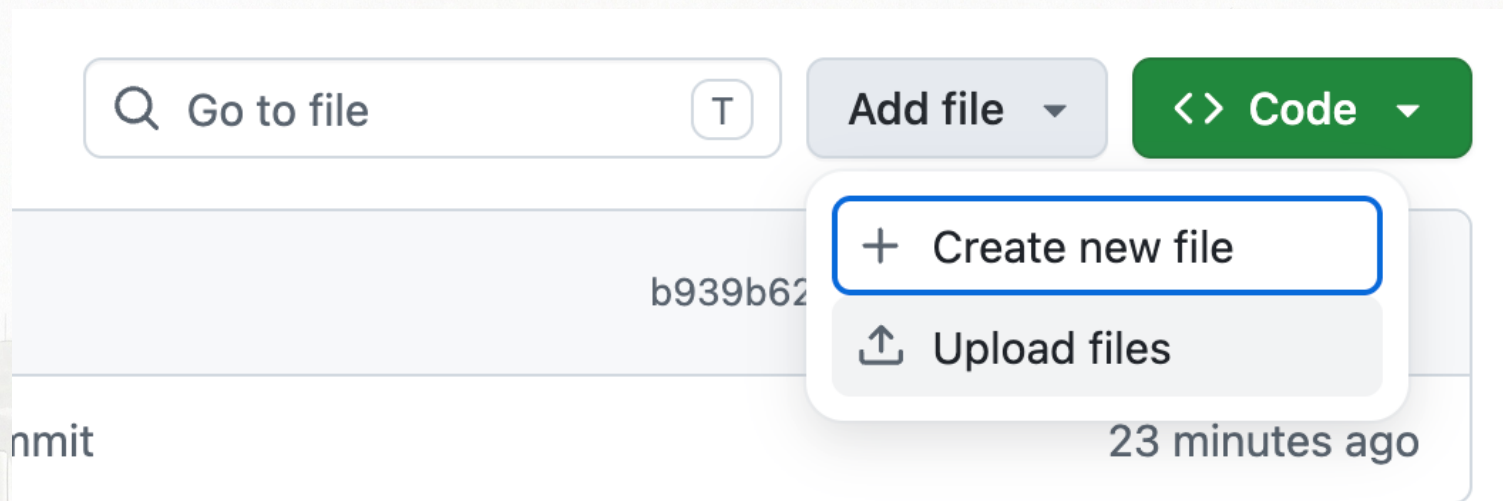

WorkBuddy AI

Completed 1m8s >

Folder tree above, files below. Here's the drag-and-drop flow:

Before you start

- In Finder, open `/Users/xili/WorkBuddy AI/2026-08-16-21-10-12/chloe-site/` — you'll drag the whole `chloe-site` folder in step 4.
- Sign into GitHub in your browser.

Use “Upload files” Function Here

 /chloe-site/index.html	×
 /chloe-site/README.md	×
 /chloe-site/photo.png	×
 /chloe-site/assets/hku.svg	×
 /chloe-site/assets/hkust.svg	×
 /chloe-site/assets/hsbc.svg	×
 /chloe-site/assets/loreal.svg	×
 /chloe-site/assets/ogilvy.svg	×

Commit changes

Add files via upload

Add an optional extended description...

☒ Commit directly to the `main` branch.

☐ Create a new branch for this commit and start a pull request. [Learn more about pull requests.](#)

Task #2

Developing a Game on Your Site

Ask AI for Help!

I would like to develop a webpage and deploy it online. The webpage allows user to play a Tetris game.
You create the files and I will drag it.

The page is tetris.html

Do I need to drag all five or just tetris.html?

WorkBuddy

Completed 8s >

You need at least these **three** — the game won't work without all of them:

File	Why it's needed
<code>tetris.html</code>	The page itself
<code>styles.css</code>	Tetris.html loads this for all visual styling
<code>script.js</code>	Tetris.html loads this for the game logic — without it the board does nothing

The game is [here](#).

Task #3

Turning your slides into interactive webpage

Step 1: AI for Transformation

Continue to chat until you are satisfied!

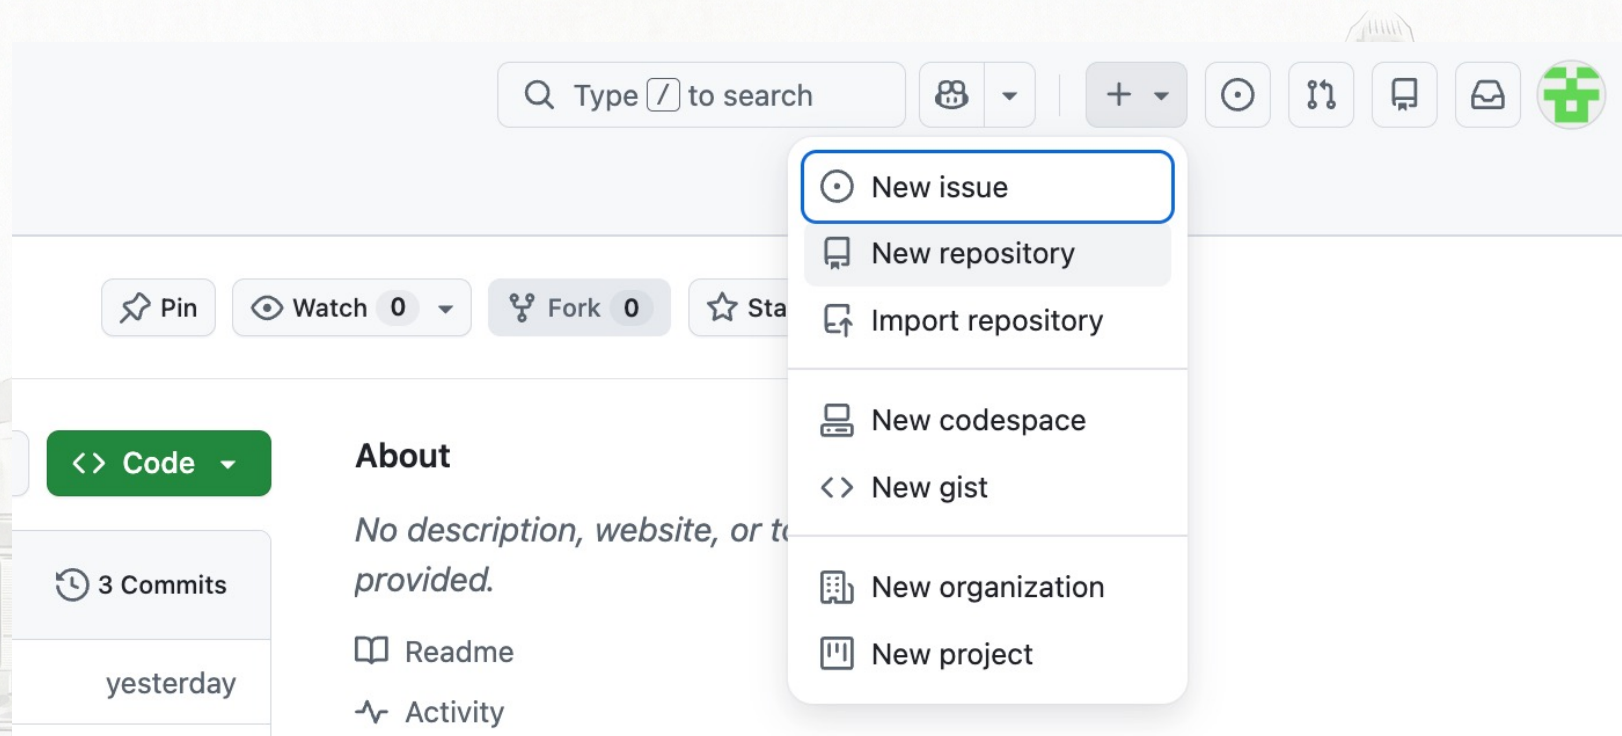

I would like to turn my slides into an interactive webpage.  CVtoWebsite.pptx Help me

Ask AI for Help!

I want to deploy it on my GitHub in a new page: <https://chloehku.github.io/demo> by dragging files. Show me the step.

Step 2: Deployment

Create a new repository

Create a new repository

Repositories contain a project's files and version history. Have a project elsewhere? [Import a repository](#).

Required fields are marked with an asterisk (*).

It's here!

Group AI Project (10%)

Choose between the following two options:

- (1) Build and deploy a website for your group/a group member/a brand**
- (2) Build a game and deploy it online**

Just submit your URL. Nothing else.

Due date: Oct 29, 23:59 pm

No classes in the coming two weeks

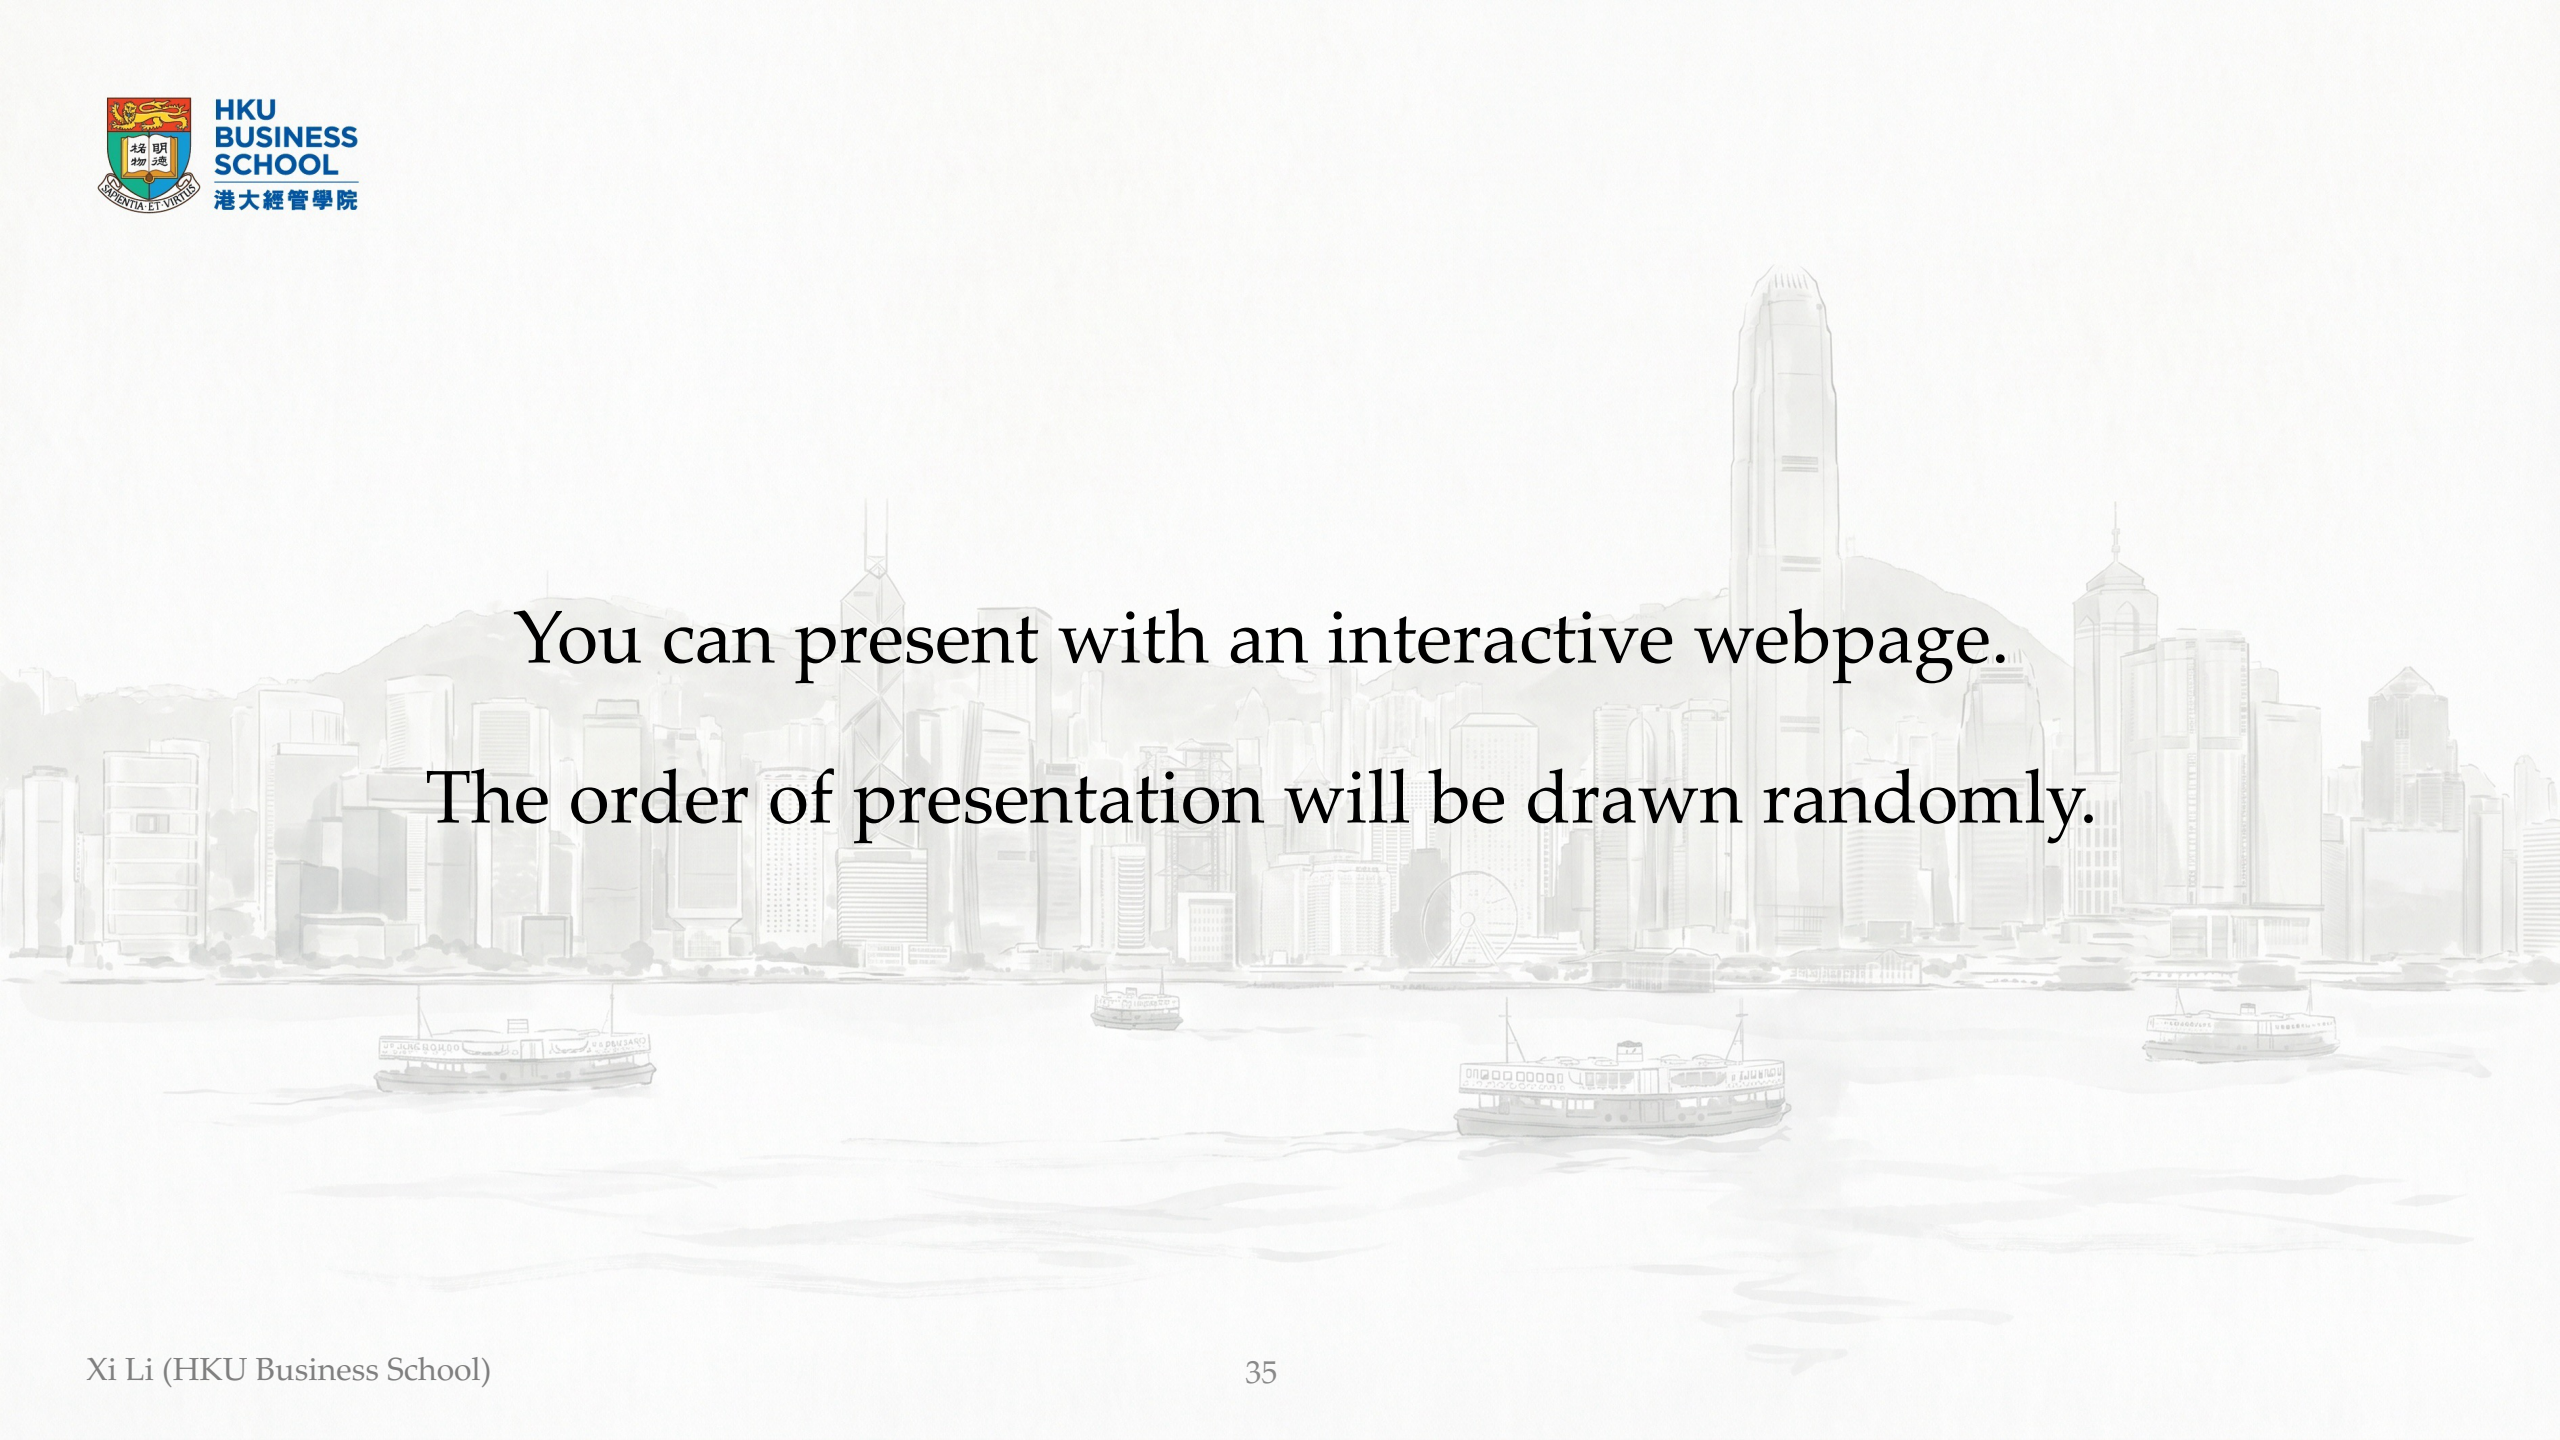

Oct 16: Reading Week

**Oct 23: 1B Class cancelled (Information Day),
1A Class also cancelled to allow you focus on course project**

Group Project (30%)

Choose a company and analyze its digital marketing strategy:

- Company website: Any issues? What can the company do to improve its website?
- Social media (e.g., Facebook, Instagram, Twitter): Is the company managing its social media accounts? Any issues? What would you suggest the company?
- Online sentiment: How people are discussing the company or its brands in online review platforms (e.g., TripAdvisor, Amazon)? What's wrong?

You can present with an interactive webpage.
The order of presentation will be drawn randomly.
